It is connected with lots of superstitions and customs. They mainly refer to the future condition of unmarried girls and boys but also to money and happiness. The main tradition is that of pouring wax through the keyhole – the shape is cast on the wall and deduction and associations take place. A shadow cast by a figure cast from wax. The draw of items with symbolic meaning, wedding band or ribbon with a bonnet - a close wedding, rosary - religious state. There is a tradition of pouring wax on cold water (often through the ear

**Palm Sunday**  
On Palm Sunday, people in Poland decorate the willow twigs with multicolored ribbons and use different grass and flowers. These 'palms' reach even a few meters in height. There are competitions for the highest palm and for the most beautiful one. When these 'palms' are ready, people go in processions. It is to commemorate the entrance of Jesus to Jerusalem. Some people are dressed in traditional folk clothes.

1 LOVE IS HAPPINESS

2

3 Elizabeth and Edward are old people with two children and they live in Warsaw. The city is beautiful

4 with the lights in the Old Town illuminating brightly. They are looking out of the window and the view

5 shows the Royal Castle square where lots of couples in love are walking.

6 Mom can you tell me your romantic story with Dad?

7 Yes, my dear!

8 \*FLASHBACK\*

9 We were in San Maio at our first meeting, he lived there and I was on holiday. I had always liked this

10 city because I love its castles like Fort National and Fort de la Conch e. I was on the beach standing

11 alone, watching the sunset and Edward came to ask me for the time. I answered it and then we

12 started to talk about our life until we fell asleep. The day after, when I woke up, I saw Edward

13 swimming and when he saw me he came back to the beach, we looked at each other and we kissed.

14 Our story finished when I came back to Warsaw, but before I left him my address.

15 A year later someone knocked at my door, I opened it and there was Edward in front of me.

16 When I saw him I immediately threw myself in his arms. He suggested me to have a walk and I

17 immediately agreed. We went out for a coffee and then we went to Vistula.

18 We talked for a long time and watched the sunset. Edward, that is your dad, told me that during that

19 time he could not stop thinking about me.

20 He stayed in my city one month and every day he came to see me. One day we visited

### THE STORY BY TEAM 3: PEACE IS THE BEST DISCOVERY

- In an Archaeological Museum, in Bursa in Turkey, there were 3 friends called Mike, Rayan and Pauline who worked there. This museum exhibited archaeological artifacts found there and around the city.
- One day, They decided to go on holiday in Palermo, in Italy.
- In this city they visited the "Palazzo Normanno", that was built in 1130 and it's the oldest royal residence in Europe. It's one of the most visited monuments of the island. In this building, they found a strange item: a parchment paper with many hieroglyphics. Rayan and Mike could decipher the text on the parchment, which showed them a message: " the secret code is in the mines in Wieliczka ".
- In Wieliczka, in Cracow, there was a mine that was used for the extraction of salt from the 13th century to 1996.
- Mike wasn't interested in that message and he decided to return to Bursa.
- Pauline was a brave girl and she flew to Cracow in order to find the mine. Unfortunately, she had two problems to find them: some thieves and gunfires.
- She arrived to the mine and she found two thieves who threatened her with gunshots and kidnapped her.
- Mike was scared because he hadn't had news from Pauline, and decided to leave to look for her.
- Once they arrived, Mike didn't have any information about her and decided to look for her in the mines. During his desperate research he found the secret place in which he two thieves were hiding Pauline, but he was discovered and was led to the thieves' den. Finally, the two hostages managed to escape through a sewer but were discovered and were locked up in the prison of the mine. During those awful days another prisoner was caught: he was the most famous Italian hieroglyphic researcher. He managed to rob the code before he was caught, and he studied it all day long in prison in order to decipher it. The code was a message of peace: "We will never reveal how our treasures are hidden, because wealth means death."
- Finally the thieves were caught by the Polish Police that was looking for them and released the three researchers who became famous for their discovery. Pauline decided to give a lecture in some States to promulgate the message of peace on the parchment: the population who wrote that message had already understood that the people of the future can kill for richness.
